

Installation Guide

Everything runs in Docker, so you don't need Python, Node, or PostgreSQL installed on your machine. Just Docker.

Before you start

Make sure you have:

- Docker and Docker Compose. Docker Desktop comes with both; on Linux you need Docker Engine 20.10 or newer and the compose plugin.
- Ports 5173, 8000, and 5432 free.
- About 1 GB of free disk space for the recipe data.

Steps

1. Clone the repository and move into it:
